EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. The application has been amended as follows: This application is in condition for allowance except for the presence of claims 24 and 32-35 to a species non-elected without traverse. Accordingly, **claims 24 and 32-35 have been cancelled.**

Continued Examination Under 37 CFR 1.114

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 13 November 2003 has been entered.

Allowable Subject Matter

4. Claims 23, 25-28, 31, and 36-40 are allowed.
5. Regarding claims 23, 25-28, 31, and 36-39: Independent claim 23 is representative while claims 25-28, 31, and 36-39 depend directly or indirectly from claim 23. Claim 23 and its dependent claims are allowable the prior art does not teach or suggest, in combination with the

Art Unit: 2813

other claimed limitations, that the Si-Ge interlayer is less than about 3.0 nm, as supported by Applicant in the declaration filed 13 November 2003, which further explains the content of original Fig. 4.

Claim 40 is allowable because the prior art does not teach or suggest, in combination with the other claimed limitations, that "said substrate and said first layer are separated by a Si-Ge interlayer positioned on an interface between said first layer and said substrate, wherein said Si-Ge interlayer does not substantially extend beyond said interface." Interpreted as follows. To the extent that the Declaration of 13 November 2003 is valid regarding the diffusion into the substrate, which is admitted to happen therein, the claims are considered allowable. It is noted that no measurement of the Ge content in the substrate was provided, and Applicant admits that Ge diffusion may occur. If such diffusion does, in fact, occur then the instant claim is, in fact, invalid because the Si-Ge interlayer would, in fact, extend beyond the interface formed between the silicide and the substrate. Further in regard to the interface. Because the interface requires contact between the silicide and the substrate, the Si-Ge interlayer does not, in fact separate the substrate and the silicide since the interface would cease to exist. Accordingly, the newly added limitation required extreme thinness (i.e. less than about 3.0 nm) for the claim to be valid since the Si-Ge interlayer would, were it thicker, contradict the presence of the interface between the substrate and the silicide layer, as required by the claim and by the definition of an "interface."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
